

## Awesome Students Doing Awesome Things!

## Let's Make Quantities!

I can make 5 in many different ways.
It's called making a rainbow. This method of matching up numbers in a rainbow to make the same sum was discovered by a German mathematician, Carl Friedrich Gauss (1777-1855). Give it a try and see how many rainbows you can make!

Eleven Toes
(10 + 0)
Adding is fun,
It makes numbers grow! I'd like to be adding,
A brand new big toe!

Each day, l'd be counting, 11 cool toes, I'm really hope-hoping,
Another toe grows!
Momma told me, I can add zero toes,
Not 1 toe!
Not 2 toes!
And momma, she knows...
Zero new toes,
Leaves me with 10,
But l'll wish for 11, again and again....

Be sure to keep track of all of your awesome work! Here is a check list to help you.
___I have used my Razz Account at www.raz-kids.com I learned how to:
___I have worked on www.mathmagician.com. I especially liked:
__I have read stories this week. The silliest story I read was:
___I have practiced my spelling this week. My favorite word is:
___I have also:
Remember: You don't have to do everything on the list. A little bit every day makes a big difference!!!

Be sure to keep practicing your counting!
_count by i's to 25 __count by 2 's to 50
__count by I's starting with 4 __count by 2's starting with I4
"Eleven Toes" can be found at http://www.mathstory.com/poems/ eleventoes.aspx\#.U9ZgirbdtzQ
